

Using the same magic formula that made the Legend Cars the most mass-produced competition car in history, officials of USLCl have introduced the Bandolero Car. The Bandolero Car is a turnkey, spec-series race car designed for drivers as young as eight years old and the young-at-heart at any age.

The Bandolero Car's motivation is provided by a thumping Briggs & Stratton 570cc Vanguard engine mounted behind the driver. Small modifications have been made to the engine to bring the once 20HP stock engine to nearly 30HP.

WHEELBASE	70.00"
